This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laerscribed's pinternational Germological Institut (GIG). LGG has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are hyplacully produced by CVD (chemical vapor deposition) or by HPHI (high pressure high temperature) growth processes and may include post growth modifications to change the color. Glutillizes the most advanced techniques and equipment currently available including, binocular microscopes, didmond color masters, non-contact-optical measuring device, a wide range analytical techniques including. FIRI, UV-VIS-NIB, cmann spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor appraisal and by malking the report list does not agree to auchase or resoluce the article.
